REGISTER OF RAINFALL IN 1924.

Kept at Cluden, North Devon
in the County of Devon
by Margaret Logan Varwell

Lat. _____ Long. _____
Time of Observation 9 a.m.
Nearest Railway Station Bideford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 10 in.
" " " " Sea Level 220 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

QUERY FORM.

On examination of the return of observations made at

Northam Fairlea 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your 1925 rainfall return with those of neighbouring stations suggests that an omission has occurred on September 1st as shown below.

If you have no reason to the contrary we would recommend that a value of .25 inch be adopted making the total for September 3.86 and the year 37.16 we should be glad of your comments on this amendment.

H. B. Carter
29.6.26.

REPLY.

I happened to be away from home on Sept 1st & left it to my gardener who may have made a mistake.

By all means correct as you propose.

What did Mr A Boyd get at Buckleigh? *.22 inch*

J. Bennett Colonel

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

South Zee

1925...

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

It is proposed to adopt 2.00 inches for January 1-3 to complete the years total at your station.

A comparison of your return with those of neighbouring suggests that an omission has occurred on Dec 23rd as shown below.

Okehampton .62

South Zee -

Chagford .68

If you have no reason to the contrary we would recommend the adoption of .65 inch.

As the measurements have been entered to the day of reading instead of being "thrown back" to the previous day, as is the usual practice, the amount measured on the 1st of January at 10 am is included in the annual total, which (if you agree to the above suggestions) becomes 54.84 inches. We should be glad of your comments on these points.

H. R. Carter
29. 6. 26.

REPLY.

30th June /26

Yes, certainly I quite agree to suggestions made - I am in a little note book I keep that on 23rd Dec^r/25 I entered "country still under snow and looking lovely, came on to blow & rain a bit this evening" - I was ill at the time with flu so I dare say some mistake was made.

Yours truly

Stanley T. Deane Pitt

Miss W. Croft
South Zee
Okehampton
Devon

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 7.

" " " " Sea Level 150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at
 Claylands, Paignton, Devon 192⁵.

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

With reference to your reply to a query about the rainfall, we receive observations from Brixham and find that on the 29th December, the quantity of 1.22 was measured there. We receive no observations from Kings Wear. Do you think it possible that the rain measure was filled completely twice instead of once on that occasion? That would make the total 1.16 instead of .66, which would agree well with other stations.

23rd June, 1926.

REPLY.

I think I must have made a mistake in the way you suggest it. I am short.

Yesterday I was at Brixham about 14 miles from here & it poured for about 40 minutes. The storm apparently passing over Torquay. When I got home my gauge was dry but later 0.1 fell. This was not a thunder storm.

June 21/26

J.M. Stirling

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Delaylands, Paignton 1925.

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations shows that the entry on 29th December is unduly low as shown below.

Paignton Vicarage 1.19 in
 " (Delaylands) 1.16 "
 " (Torquay Road) 1.12 "

It is recommended that a value of 1.16 in. be adopted. If you concur in this, the total for Dec. will be 5.12 in. and for the

Engagements—December, 1925.

REPLY.

I have little doubt my entry is correct. I have turned up my diary & enclose the page. I keep this book with the gauge & make the entry myself directly after measuring. Both places you mention are about 2 miles from here in direction of Torquay & I often find Paignton & Torquay vary considerably.

Our Ham about 5 miles from Torquay & say 2 miles from Waddeton Court or Stoke Gabriel have you any records there or at Kingswear or Brixham? Brixham about 2 miles.

REGISTER OF RAINFALL IN 1921

Kept at Melbury Reservoir (Parkham)
in the County of Devon
by Northam H.C. Frank Harding

Lat. _____ Long. _____
Time of Observation 9 a.m.
Nearest Railway Station Bideford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. _____ in.
" " " " Sea Level 517.00 ft.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should not be entered on this form.

FORM 1090.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Melbury Reservoir
in the County of Devon
by Frank Harding for Northam & Co.

Lat. _____ Long. _____
Time of Observation 9 a.m.
Nearest Railway Station Bideford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. _____ in.
" " " " Sea Level 517.00 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1923.

Kept at Freedom Park Plymouth
in the County of Devon
A. Victor Briggs

Lat. 50° 22' Long. 4° 8'
Time of Observation 9am
Nearest Railway Station Mutley
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 208 ft.

Jan. 1, following.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Freedom Park, Plymouth 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations shows that on 5th August and October 15th the amounts entered are not in good agreement with the places set out below.

	Aug. 5.	Oct. 15.
Statterwater	1.11	.04
Drakes Place	1.39	.10
Freedom Park.	.41	.50
Roaders Reservoir	1.28	.10
Barthley do.	1.20	.13

It is recommended that values of 1.41 and .05 in. be adopted.

If you concur in these amendments the totals for August and October will become 5.32 and 4.33 inches respectively, and that for the year 47.92 inches.

We shall be glad to hear from you on these points.

H. Carter
17.6.26

REPLY.

I thank you for kindly drawing my attention to the undotted error in the record of rainfall at Freedom Park on Aug 5. The observer evidently omitted the inch.

As regards the .50 on Oct 15th I find an error in the entry was made as I find the Check Gauge (i.e. this gauge) was entered upon the Hyetograph Chart as .10 which compares with Drakes Place which is less than $\frac{1}{2}$ mile to the westward thereof. Totals August 5.32 & Oct 4.38 & the year 47.97. H. W. 18.6.26

Adopt 1.41 and .10.
For use in M.O. 3.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division.....

Form 1090.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
(formerly B.R.O. Form A.1). REGISTER OF RAINFALL IN 1921.

1500

Kept at *Plymouth Mental Hospital*
in the County of *Devon*
by

Lat..... Long.....
Time of Observation.....
Nearest Railway Station.....
Diameter of Funnel of Rain Gauge *5* in.
Height of top of Gauge above Ground *1* ft. *0* in.
" " " " Sea Level *607.5* ft.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1923.

Kept at CATTEWATER
in the County of DEVON
by Staff Meteorological Office

Lat. 50° 22' N. Long. 4° 8' W.
Time of Observation 0700 & 1800. (7hr-1hr)
Nearest Railway Station Turnchapel
Diameter of Funnel of Rain Gauge 1.8 in.
Height of top of Gauge above Ground 8 ft. 12 in.
Sea Level 82 ft.

IMPORTANT NOTE.—Rain should be measured daily at 7 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

P.T.O.

AIR MINISTRY.
FORM 1091 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
(formerly B.R.O. Form A.2). REGISTER OF RAINFALL IN 1923.

Kept at Mount Batten
in the County of Devon.
by Meteorological Office Staff

Lat. 50°22'N Long. 04°08'W
Time of Observation 12h. + 7h
Nearest Railway Station Plymouth
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 82 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should not be entered on this form.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
(formerly B.R.O. Form A.1). REGISTER OF RAINFALL IN 1922.

Kept at Plymouth, Helston
in the County of Devon
by H. Victor Prigg

Lat. 50° 22' N Long. 4° 8' W
Time of Observation 9h 21h
Nearest Railway Station _____
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground _____ ft. 12 in.
" " " " Sea Level 117 ft.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should not be entered on this form.

Colin M. S. May

(P.T.O.)

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Wydemect, Derbyshire 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

The entry on your 1925 rainfall return for February 22 appears low compared with neighbouring stations as shown below

Huccaby House	1.14
Wydemect	.15
Holne	.89

If you have no reason to the contrary we would recommend that 1.15 inch be adopted making the total for the month 8.21 and the year 69.57 inches. We should be glad of your comments on this amendment.

H. C. Carter
29.6.26

REPLY.

I do not understand why there should be such a difference between the registering of the Rainfall for July 22. 1925 taken at Huccaby House and here. Holne always does register more than here -

and in support of my return for that day July 22. 1925

I refer to my diary - for the following entries
21st July 3 showers till 4, snow till 5 about 1 1/2 in
22nd " Fine all day & sunny all day
23rd " Cold Hailstorms

I mention these days, to show that I did not enter any heavy rain, as there would be to register anything over an inch.

I am quite willing to adopt your figures of 1.15 for July 22. if you like but before doing so would like to hear from you.

Colin M. R. May.
Accept. 1.15 inch.

For use in M.O. 7.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Huccaby House

in the County of Devon

by Major H. H. Joll

Lat. 50.32.12 Long. 3.53.20 W.

Time of Observation 9.0 a.m

Nearest Railway Station Princetown

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. - in.

" " " " Sea Level 900 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1922.

Kept at moor Lodge, Princetown.in the County of Devon.by T. C. Bridges Esq.

Lat. _____ Long. _____

Time of Observation 9 a.m.Nearest Railway Station PrincetownDiameter of Funnel of Rain Gauge 5 in.Height of top of Gauge above Ground 0 ft. 9 in." " " " Sea Level 1200 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1924

Kept at Salcombe
in the County of Devon
by Walter J Shaw

Lat. 50.17 N Long. 3.44 W
Time of Observation 9.0 A.M.
Nearest Railway Station Tingbridge G.W.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 280 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923

Kept at The Goppe, Seaton
in the County of Dorset
by Herbert G. Roberts

Lat. 50° 43' N Long. 3° 2' W
Time of Observation 9 am
Nearest Railway Station Seaton, L.W. Ry
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 5 in.
" " " " Sea Level 220 ft.

1703
4 JAN 1924

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

..... *Seaton, The Cope* 1925.....

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your 1925 rainfall return with those of surrounding stations suggests that an omission has occurred on January 14 as shown below

Seaton	Fendren	.24
- do -	The Cope	-
Sidmouth		.26

If you have no reason to the contrary we would recommend that a value of .25 inch be adopted making the total for the month 4.88 and the year 38.60 inches.

We shall be glad to hear if you concur in this amendment.

H.R. Carter
28.6.26

REPLY.

30 June 1926

*It seems very probable that the omission occurred as stated & I have altered my figures accordingly.
Sorry for the error.
H. J. Poot*

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 7.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division

REGISTER OF RAINFALL IN 1921

Kept at Redstone
in the County of Devon
by Frank Howard

Lat. Long.
Time of Observation 9 AM
Nearest Railway Station
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
Sea Level 760 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Head Weir
in the County of Devon
by Frank Howarth

Lat. _____ Long. _____
Time of Observation 9 A.M.
Nearest Railway Station _____
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 720 ft.

1496
1645
18 FEB 1925
Jan. 1, following.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Burraton
in the County of Devon
by Frank Howarth

Lat. _____ Long. _____
Time of Observation 9-AM.
Nearest Railway Station _____
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 755 ft.

18 FEB 1925

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1921.....

Kept at Sheepston AAO
 in the County of Devon
 by Rev H H Breton

Lat. 50° 29' Long. 4° 1' W
 Time of Observation 9.2. A.M.T.
 Nearest Railway Station.....
 Diameter of Funnel of Rain Gauge.....in.
 Height of top of Gauge above Ground.....ft.....in.
 " " " " Sea Level 749 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
 If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1924.

Kept at Sidmouth
 in the County of Devon
 by Chas. R. Ford

Lat. 50.41 Long. 3-14-30
 Time of Observation 9
 Nearest Railway Station Sidmouth
 Diameter of Funnel of Rain Gauge 5 in.
 Height of top of Gauge above Ground 1 ft. in.
 " " " " Sea Level 148 ft.

Jan. 1, following.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day.
 An Observer who prefers not to conform to this almost universal rule should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should be entered on Form 1090.

Kept at Hillerton
in the County of Devon
by J. Wilson

Lat. _____ Long. _____
Time of Observation 9-9³⁰ AM
Nearest Railway Station Hillerton 1 mile
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 180 in.
" " " " Sea Level 180 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should be entered on Form 1090.

K at Killerton

in the County of

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

Sea Level 159 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should not be entered on this form.
